8. Marketing and Promotions -Completed

# Challenges We faced

- We faced really tough when it comes to Javascript part because we don't have much practical lively examples in Javascript.
- Next, Time management which is very complex for us, though we are new learners it takes some time to understand and implement the codes in our websites.
- Every one of us, tried our best to achieve the above mentioned task which is been given to us.

# Learnings From course

## HTML

We learned the basic HTML5 tags like pre, emp, div Strong and learned how the skeletal of professional website schould look and interact

## CSS

we learned the complete css and properties like flex display and gradient styles and assignment mam gave allow us to learn lot more ourselves

## JavaScript

We learned that how to use insert js snippet in the command prompt in the browser itself and they taught us all the basics of js and told the difference between let and var and assignment they gave allow us to make mistakes and learn from it

Thank You
